

## E.ITEC ASIA PACIFIC Sdn Bhd

*Your reliable partner for all problems concerning  
water cooled high current cables*

If it comes to water cooled high current cables you can trust  
our Expertise, Reliability and Professionalism (ERP)

Here at **E.ITEC** Asia Pacific, located in Rawang, Selangor, Malaysia, we believe first and foremost in providing fast and reliable service to our valuable customers. Our fully equipped workshop has been established end of 2011 and is a joint venture between E.ITEC of France, one of the leading manufacturers for high current systems, and **Dynamic Exim (M) Sdn Bhd**.

*Some of us have been with the  
Steel industry for many years, i.e.,  
we do understand the operational  
problems you might be facing and  
we are here at your service to  
solve your high current problems.*

Resistance measurement with our micro-ohm-meter

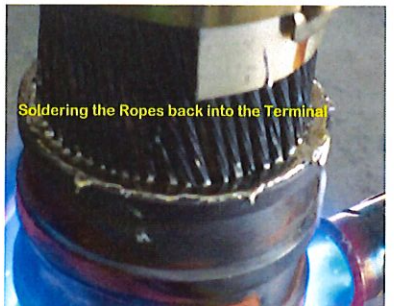

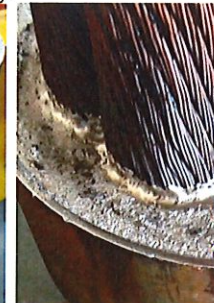

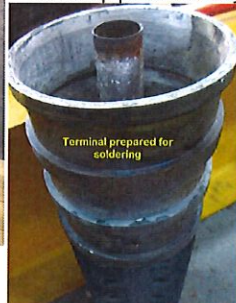

Whether you are looking at burst or burnt water hoses, damaged or leaking terminals, broken wire ropes or simply at a non-functioning water cooled high current cable, just drop an email to us or give us a call, we will be more than pleased to assist you. Since we are located in the center of Malaysia our response time will not be long.

**And to us it does not matter who the original manufacturer is, we repair every cable from every supplier.**

Even if damaged ropes need to be replaced or protective sleeves have to be exchanged, all these procedures will be handled in our workshop professionally.

Rest assured that all repaired cables are undergoing a final Quality check before leaving our Workshop, e.g., pressure test, resistance measurement.

**Based on our close cooperation with E.ITEC in France we are also always up to date with the latest developments as far as high current systems are concerned.**
